Specializing in Amputee Care

*Working closely with your
Prosthetist is essential.*

Perry Prosthetics, Inc. is committed to providing the individual amputee the highest quality of care so that he or she may re-enter and regain his or her place in society as an employee, employer, teacher, student, parent, child, or loved one.

Our goal is to provide a prosthesis that is first

comfortable, then functional, so that the individual amputee can live life based on desires and needs — not limitations.

We meet our goals through mutual welfare and benefit, we promote a sense of self-esteem, provide continuing research and education, and utilize advanced techniques, leading edge materials, and the highest quality equipment

We continually assess our goals through a continuity of care, which consists of high quality services, excellent follow-up procedures, and an effective communication with the people for whom we provide care as well as with other health care professionals.

SUPPORT NETWORK

T.A.S.K.

The “*Toledo Amputee Support Klinik*” is a new support group available for amputees and their loved ones, as well

as other healthcare professionals, to be utilized as a source of information and education concerning the loss of a limb. Losing a limb is a life-changing event, one which leaves a person and his or her family with many unanswered questions. The goals of the support group are to answer these questions, let people know they’re not alone, and give amputees an opportunity to meet and interact with others who have experienced similar circumstances. Chris Perry is the director of TASK. He has been an amputee since 1984 and has learned a great deal about amputee care and prosthetic rehabilitation.

Supporting one another.

“...not knowing how my life would change or what to expect was very difficult. I was fortunate to have an amputee visit me while I was in the hospital. He was able to answer my questions, and I watched him walk around. I now had an idea of what was next...”

– Chris Perry

For more information on TASK, or to become a peer support volunteer, contact Chris Perry at 419.872.7336. Be sure to request a free newsletter.

SELECTING A PROSTHETIST

It is important that each individual plays an active role in his or her prosthetic rehabilitation. The best way to do this is to gain specific information about the steps involved in the rehabilitation process and learn what options are available.

Perry Prosthetics offers consultation and evaluation appointments in the office or at the patient’s location. This provides the patient an opportunity to both learn about prosthetics and meet the practitioner who will be providing his or her care. Patients will always have access to a state licensed BOC or ABC certified Prosthetist for questions. Consultations are provided without commitment and are free of charge.

To schedule a free consultation with Perry Prosthetics, call the number below.
