

CARE® Course – Upper Extremity

An Inter-Disciplinary Co-operative Approach To Comprehensive Amputee Rehabilitation

Presented by:

Co-operative Amputee Rehabilitation Education (CARE®) focuses on the appropriate rehabilitation treatment for amputees. A collaborative approach is needed for a successful transition of the stages in the treatment and therapy of a patient.

Who should attend? Any medical discipline that cares for an amputee. Whether you are a doctor, nurse, physical or occupational therapist you will benefit from our comprehensive education.

Cost? The one day CARE® Course registration fee is \$195 and includes continental breakfast, lunch and snacks. If you wish to stay at the Hilton Garden Inn we have a special room rate of \$109.

Join us in learning advanced current upper extremity amputee rehabilitation techniques by leading medical professionals. Also, learn the exercises to keep patients active and healthy.

Bambi Lombardi, OTR/L, Otto Bock Inc. along with Chris Perry, CP, LP, founder of Perry Prosthetics, will present this course.

“We are committed to providing our amputees with a life long relationship filled with quality care and education!”
– Chris Perry

Christopher Perry, CP, LP, has managed his prosthetics practice for eleven years. His focus and attention to detail has earned him a terrific reputation with the local Toledo referring sources. He is responsible for consistently bringing the latest prosthetic technology to his patients. Some of the state-of-the-art products include a microprocessor knees, elevated vacuum and an actively flexing hip joint.

Chris recently attended the latest educational program for treating upper limb patients. He would like to share what he has learned by inviting you to CARE® Course - Upper Extremity where we will focus on the determinants of selecting the type of limb for each patient and reveal the science behind developing and fitting the latest prosthetic technology. The course will also further your understanding on the role each professional plays in the rehabilitation process of an upper limb amputee, whether congenital or traumatic.

Join Chris and our team for this exciting course call today to register.
